

COST PER PARTECIPANT EARLY BOOKING: 2500 euro + VAT(for booking 31/10/2026)

COST OLD STUDENT CURSOSDECIRURGIA EARLY BOOKING: 2000 euro + VAT (for booking 31/10/2026)

COST PER PARTECIPANT LATE BOOKING: 2900 EURO + VAT

AUDITOR EARLY BOOKING: 500 EURO + VAT

AUDITOR LATE BOOKING: 900 EURO + VAT

All materials, implants, membranes, bone, instruments, and surgical models are provided.
This program is designed to ensure each participant leaves with practical competence in the discussed procedures.

Moreover, the procedures will also be carried out using the *Magnetic Mallet*.

Why Join our CADAVER LAB?

From Surgical Anatomy to Full-Arch Rehabilitation in Two Intensive Days
This 2-day Cadaver Lab combines theory with practice.

Every procedure presented during the theoretical sessions is then performed on cadaver specimens under the supervision of **Brazilian Professor** Fabio Guerra.

From anatomical dissection to implantology, full-arch rehabilitation, and extreme atrophy solutions, participants are guided **step-by-step** through:

- Full-face anatomical dissection
- Zygomatic implants
- Pterygoid implants
- Transnasal implants
- Transsinus implants
- Mandibular ramus and chin bone harvesting
- Inferior alveolar nerve lateralization and transposition
- Bone grafting and Guided Bone Regeneration
- Sinus lift procedures
- All-on-4 full-arch protocols
- Bichectomy
- Lip lift procedures

You Won't Just Learn the Techniques. You'll Perform Them.

The course begins with full-face anatomical dissection, identifying structures such as the lingual nerve, facial artery, mandibular nerve, maxillary sinus, and pterygoid plates.

Participants then progress through bone harvesting, augmentation, GBR, sinus lifting, nerve management, and full-arch rehabilitation, before advancing to solutions for severe maxillary atrophy, including zygomatic, pterygoid, transnasal, and transsinus implants.

What makes this course unique is the integration of anatomy, theory, surgical planning, and hands-on execution. Each technique discussed in the lecture room is reproduced in the lab, transforming knowledge into practical experience.

What You'll Gain:

- A-to-Z surgical training, from anatomy to full-arch rehabilitation
- Anatomical knowledge for safer decision-making
- Hands-on experience with implant and augmentation techniques
- Practical All-on-4 training, from planning to execution
- Management of severe maxillary atrophy
- Real-case discussions and evidence-based treatment planning
- Two Days. One Complete Surgical Journey.

From anatomy to reconstruction. From full-arch rehabilitation to solutions for extreme atrophy.

A comprehensive experience for clinicians seeking surgical knowledge, preparation, and confidence in complex implant rehabilitation.

IMPLANTS**

VERONA 5 - 6 FEBRUARY 2027

LECTURER: PROF. FABIO GUERRA

- ANATOMY DISSECTION
- ALL-ON-4
- SINUS LIFT
- GBR
- TRANSINUS IMPLANT
- TRANS-NASAL IMPLANT
- ZYGOMATIC IMPLANTS

CURSOSINTERNACIONAISDECIRURGIA
The 100% practical courses

www.cursosdecirurgia.it

PARTICIPANT REGISTRATION FEE INCLUDES:

Didactic materials, surgical instruments, and disposable supplies
One anatomical specimen per two participants (including corresponding CT scans)
HD recording of master dissection sessions
Guaranteed access to the dissection hall
Catering services during the course
Certificate of participation
Magnetic Mallet hands-on

OBSERVER REGISTRATION FEE INCLUDES:

Catering services during the course
Attendance at theoretical sessions
Guaranteed access to the dissection hall as an observer
Certificate of attendance

HOW TO REACH THE VENUE

The course will be held at:
ICLO Teaching and Research Center

San Francesco di Sales, Verona
(Via Evangelista Torricelli 15/a)
BY CAR

Take the Verona Sud exit. Continue toward Via Flavio Gioia in Verona, keep right, make a slight left, and take Via delle Nazioni. Turn left onto Via Torricelli.

BY TRAIN

From Verona Train Station (4.5 km / 2.8 miles)

Taxi: ~10 min (call 045 532666)

Bus: ~18 min – Take Bus No. 61 from Alpo-Via Don Melotti

(Tickets & info: Azienda Trasporti Verona Srl – 045 805 7922)

LECTURER: **PROF: FABIO GUERRA**

Maxillofacial Surgeon and Professor in Brazil at the University of São Paulo.

Recognized worldwide as one of the leading experts in maxillofacial surgery and oral rehabilitation, he conducts courses and lectures globally on anatomy, oral surgery, aesthetics, and implantology.

PROGRAM:

The program consist in **2 days** of course:

1 of **Theory** and 1 of **Practice**

1

FIRST DAY
THEORY

A focused session covering the key principles and indications for precise surgical planning, **anatomical** considerations and **management of free-hand advanced implantology procedures.**

Topics include:

anatomical dissection, bone grafting with ramus and chin harvesting, sinus lift, titanium mesh bone augmentation, Khoury technique, nerve lateralization, zygomatic implants, pterygoid implants, and transnasal implants.
The session provides the anatomical and clinical foundation required to approach complex surgical procedures safely and predictably.

2

SECOND DAY
PRACTICE

An **intensive practical** session in which will be performed advanced surgical procedures on cadaver specimens, applying the techniques introduced during the theoretical program.

Hands-on procedures include:

anatomical dissection, onlay bone grafting with ramus and chin harvesting, sinus lifting, titanium mesh bone augmentation, mandibular nerve lateralization, bicectomy, All-on-4 rehabilitation, lip lifting, zygomatic implants, pterygoid implants, transnasal implants, and transsinus implants.

Each technique is performed step-by-step under expert supervision, allowing participants to translate theoretical knowledge into practical surgical experience.

LEARN ADVANCED SURGICAL TECHNIQUES.
